

Here is a simple Punnett Square worksheet that you can use to practice genetics:

1. Cross: Eye Color
  - o Parent 1: Brown Eyes (Bb)
  - o Parent 2: Blue Eyes (bb)

Fill in the Punnett Square below:

	B	b					B	
	-----		-----	-----				
				b				

2. Cross: Blood Type
  - o Parent 1: Type A (IAi)
  - o Parent 2: Type B (IBi)

Fill in the Punnett Square below:

	IA	i					IB	
	-----		-----	-----				
				i				

3. Cross: Hair Texture
  - o Parent 1: Curly Hair (CC)
  - o Parent 2: Straight Hair (SS)

Fill in the Punnett Square below:

	C	S					C	
	-----		-----	-----				
				S				

Remember, uppercase letters represent dominant traits, and lowercase letters represent recessive traits. Fill in the Punnett Square by combining the alleles from Parent 1 and Parent 2 to determine the possible outcomes and their probabilities.
